About me

I am an enthusiast of free software and open source solutions, unafraid of the challenges presented to me. I've created a library called **vite-express** which amassed **400+ stars** on GitHub and **200k downloads** on NPM. Creating code that is transparent to the programmer and software that is easy to use for the end user is a key aspect of my work. By combining people with knowledge, enthusiasm and skills you can create a great team able to solve any problem, that's the team I strive to work in.

Experience

Software Engineer @ Software Mansion

From building internal management system, through implementing a social media app for a startup, to being a part of the team responsible for open-sourced developer tools used with custom blockchain language and creating a package registry.

`TypeScript` `React + React Native` `Rust` `Django`

XI 2022

Fullstack Developer @ ReasonApps

Creating a logistics system from scratch for a London-based company involved in the collecting, transporting and analyzing blood samples and Covid-19 tests. Implementing solutions for both the frontend layer using Next.js and the backend using Nest.js

`TypeScript` `React + React Native` `Next.js` `Nest.js`

II 2022

Front-end Developer @ ReasonApps

Developing a platform that connects influencers with fans, allowing one to sell services and products of top creators. Introducing new functionalities and managing the front end layer.

`TypeScript` `React` `Next.js` `GraphQL + Hasura`

VI 2021

Tech

`TypeScript`
`React + React Native` `Next.js`
`Node.js + Express.js` `Nest.js`
`Docker` `Linux` `Git`
`GraphQL + Hasura`
`Python + Django`
`Rust`

Education

Politechnika Krakowska
Master of Engineering in Cybersecurity
Part-time

VI 2023

Politechnika Krakowska
Bachelor of Engineering in Computer Science
Part-time

X 2019
